ALEKSANDAR DJOKIC

SENIOR QA ENGINEER

PROFILE

Senior QA Engineer with nearly 6 years of AAA GameDev QA experience at Ubisoft, working across shipped and in development titles in Agile, cross-functional teams.

Experienced in cross-platform testing, test documentation, client-side feature validation, regression testing, bug reporting, and full bug lifecycle support across PC, PlayStation 5, Xbox Series X, and Stadia.

Focused on QA ownership, clear communication, and stable feature delivery in live service GameDev environments.

PROFESSIONAL EXPERIENCE

Ubisoft Belgrade

2020 - PRESENT

Senior QA Engineer

Projects

Riders Republic, Assassin's Creed Mirage, Unannounced Project

- Owned QA validation for gameplay, UI, content, and technical features across AAA projects from development to post-launch.
- Created and maintained test plans, test cases, and checklists based on feature requirements, design documents, builds, and priorities.
- Tested client-side game behavior across PC, PS5, Xbox Series X, and Stadia, covering gameplay logic, UI flows, and platform-specific issues.
- Reported, tracked, and verified defects through the full bug lifecycle with clear reproduction steps, evidence, logs, screenshots, videos, and risk context.
- Executed manual functional, smoke, regression, exploratory, acceptance/UAT testing across multiple builds and platforms to support release readiness.
- Worked with automation QA and developers on UI flows for automation, including running existing automated tests and reviewing results for QA reports.
- Participated in feature planning and documentation review with developers, designers, production, QA leads, and QA teams to clarify requirements, communicate risks, test status, and feature readiness.
- Prepared and maintained test environments, including build deployment, configuration changes, Linux/cloud-based workflows, and terminal validation.
- Prepared QA summaries covering test coverage, defect trends, open risks, and validation results for QA leads, developers, and production.
